

Corporate Profile

Webserver.com.my specializes in the hosting mission critical application and database-driven websites. Our experienced and understanding of advance technologies has allowed us to develop one of the most stable and responsive hosting environment for any web sites. All sites hosted at Webserver.com.my are housed in the most advance server facilities in Malaysia. Our Data Centers are powered by fully redundant systems with backup generators.

We understands that a sophisticated Data Centers are meaningless if your server crashes. To this end, webserver.com.my has a complete monitoring system which includes an expert system that both monitors the server and can automatically repair problems without a technician assistance. 90% of all webserver.com.my can be solved by our monitoring system within 1-2 minutes. If a problem is not solved automatically, our skilled technicians are on site to complete the task.

We are able to be proactive because we don't just host web sites, but we are also capable of developing them as well.

Our Testimonial

“ I was so satisfied the good services from you guys, you guys have given me the best quality support and fast. So keep up the good work! You guys are totally awesome :) ”
