"I have of late been receiving quite a number of e-mails from your system indicating that viruses were sent to me and that it was stopped by your system. I realize that this means your servers and anti virus software are doing their job. My Yahoo account is frequently clogged as they are unable to stop these viruses. My other e-mails hosted with other hosting companies allow viruses to pass through unfiltered as well. I would just like to thank you for keeping my computer and e-mail inbox virus free."

In fact, your company was strongly recommended by my IT Support Person, Jeffrey Wong, who did a very thorough research amongs to many other companies in Malaysia. Looking forward to a continuously supportive relationship."

TESTIMONIALS

Listen to what our clients got to say about our services ...

"We would like to comment on the excellent technical support we have been receiving so far from your company. Though our set up was complex, your technical support staff was patient and cooperative with our needs. In particular I would like to mention Wong in technical support who consistently went the extra mile in his efforts. We have also called at night and are pleasantly surprised to find quick responses from the technical staff. Once again we thank you for a world class service."

~ Elijah Low, www.E-latterrain.com ~

"I don't know about the cheapest webhosting around but the general rule of thumb I hold on to is 'good stuffs don't come cheap'. One should be looking for the support services rather than the prices because the 'cost' of bad service is much more 'expensive' than the savings you made from the yearly fee. I personally would suggest www.WebServer.com.my because of their proven round-the-clock support."

~ Kenny Lim,
www.elventechsolution.com ~

"The server I resell for is located in Malaysia. This is a very impressive server, as the technology is top notch and their customer service is superb. I think you will find the prices extremely competitive, the technology excellent, and customer service quite pleasant. I can confidently recommend one of the best Web Hosting companies I've ever dealt with. This company has the most skilled and efficient technical staff I seen yet, and their service is outstanding."

~ Client from USA ~

"Your team has been proactive in suggesting new ideas and solutions whenever any problem arises. As a demanding corporation, it certainly was a pleasure and comfort dealing with people who are always ready to devote enough attention to set things right. Unfortunately, in this day and age everyone seems to be too focused on either 'How cheap they can buy something' or 'How cheap they can get something done' and time after time people just simply do not get what they pay for. Fortunately for us, our dealings with Acme not only led to very competitive rates for the services rendered but through the experience and professionalism of your staff, Acme Commerce Sdn Bhd was able to maximize our return beyond our expectations from the day of the sale.

I have no hesitation to commend on your staff for their professional approach and excellent attitude placed on customer service in ensuring that our website is readily accessible at all times.

With the highly skilled team of yours and provision of excellent service, it makes it even more the reason to continue to subscribe to your services. and we laud your effort and hope it will continue in the same vein in the future. As long as you continue to maintain this high level of service excellence, I am confident that you would succeed in securing new business opportunities."

~ K B L im, www.sportstoto.com.my ~

"Yes I noticed all these virus warnings and was concerned about this as well. Thank you all for updating the servers with anti virus software. Great job you guys. Of course we run as well anti virus software on our systems and never open any attachments.
Best regards "

~ Client from Panama ~

"I can't even tell you how pleased and grateful I am that you have purchased and installed the anti-virus software for the e-mail server. I got two messages today letting me know the virus never reached my mailbox. I also love the way it is set up, that it was coming from my domain mail address. What awesome software, it works great. I know all the clients will also be grateful to you for this. Thank you again!"

~ Donna, USA ~
