

VIRTUAL PRIVATE SERVER

Hosting Virtual Private Server (VPS) in Malaysia since 2002. Our experience in Windows and Linux VPS will be an advantage for you to have a trouble free hosting experience. Our latest stable of Microsoft HyperV and VMWare servers make it even more reliable.

If you are looking for a reliable dedicated server but do not want to pay as much? Look no further. Our Managed or Unmanaged Virtual Private Server (VPS / VDS) is an affordable solution for you to enjoy the flexibility of having a dedicated server with the cost of a shared hosting services.

This solution is most suitable for application developer, hosting resellers or corporates looking for reliable and cheaper dedicated server alternative. All servers are hosted in the most advanced data centers in Malaysia – AIMS or CJ1 Data Center with good local and international connectivity.
